## 6th BDI-Workshop on SDScomXML

18<sup>th</sup> December 2017

### Future Challenges in the Supply-Chain

Efficiency and data quality are the cornerstones in supply chain communications, and SDScom evolves when requirements change. The upcoming BDI workshop discusses real-life cases of data transfer not (yet) covered: Notifications according to CLP article 45 impose additional data requirements, no matter if the notification will be covered by SDScom. And if two IT systems exchange information for more than one country, a product-centered approach can reduce redundancy and consistency checks. Proceedings from the automotive and trading sector round up a day that will outline the roadmap of data exchange in European chemical regulations.
